INTRODUCTION

ALI INDUSTRIES, established in 1988, is basically the parent company of **NFC** fans. This company has been manufacturing electric armature for fans, washing machines, coolers, dryers etc. This company is a pioneer in introducing imported quality electrical steel sheet armature (the most energy efficient material of motor) in Pakistan. We have the latest stamping press technology through which all machining of motor is done. Being a manufacturer of the main component of the fan motor (electric armature), on which the whole warranty of the product lies,

Our company (**ALI ELECTRICAL INDUSTRIES**) decided to launch a new brand named **NFC Fans**. The main theme of our company is to provide the most energy efficient fans and home appliances that fulfill the expectations of our valuable customers.

QUALITY POLICY

“We deliver, on the basis of an efficient quality system, The best Products & Services which conform to our customer requirements & expectations.”

The Quality objectives of NFC Fans are measurable & Consistent with quality policies.

99.9% PURE COPPER WIRE

Rotor & Stator Pure Electrical Steel Sheet
